

PACKMASTER® 3

PACKMASTER 3 is a soft and resilient non-asbestos packing saturated throughout with petrolatum and graphite which offers added sealability. This product is particularly suitable for older or worn equipment or scored shafts - the construction is more readily deformable to meet these conditions. PACKMASTER 3 is commonly used for distillation units, cooling water systems, diesel and lubricating oils where low to medium pressures are encountered. It can also be found in use for hot and cold water, very mild acids and alkalis, rotary, centrifugal, and reciprocating pumps, and low pressure static seals.

TEMPERATURE	To +500°F(+260°C)
PH RANGE	4 - 10
SHAFT SPEED	To 1000 fpm
PRESSURE	To 200 psi (14 Bar) Rotary/Centrifugal
CONSTRUCTION	Square Braid
