### **STYLE 8922**

Every fiber in this proprietary SYNTHETPAK<sup>®</sup> packing is completely impregnated with PTFE by a special Garlock manufacturing process. All internal voids are filled, eliminating the dry centers left by other packing treatments. A carefully applied high-temperature surface silicone lubricant eases start-up. Style 8922 offers the clean, dependable service that the food processing and papermaking industries demand. It is a true general service packing for many types of rotary and reciprocating services.

<b>TEMPERATURE</b>	-170°F to +550°F -110°C to +288°C
<b>PH RANGE</b>	0 - 12
<b>SHAFT SPEED</b>	To 2500 fpm Plus
<b>PRESSURE</b>	To 500 psi (35 Bar) Rotary/Centrifugal
<b>CONSTRUCTION</b>	LATTICE BRAID <sup>®</sup>

### **STYLE 8922-NO LUBE**

The same product as described above, but without the final surface silicone lubricant.
